## **Drawings**

1. The drawings were received on March 9, 2004. The Examiner accepts these drawings.

## **Reasons for Allowance**

2. Based on applicant's arguments (pages 6-24) filed on September 4, 2007, with respect to claims 1-13 have been fully considered and are persuasive. As a result the art rejection of claims 1-13 have been withdrawn. Therefore, claims 1-13 are allowable.

3. The following is an examiner's statement of reasons for allowance.

The prior art of record fails to teach or suggest non-contact measurement method and apparatus comprises (a) a transformation estimator coupled to said image register and adapted to register said at least one image of said object to said object reference model and a gauge measurement module configured to receive said registered image of said object and to identify gauge measurements from said registered image of said object in combination into other features and elements of claim 1; (b) providing data representative of a known reference model of said object; registering said image with said reference model data; and identifying gauge measurements of said object from said registered image of said object in combination into other features and elements of claim 5; (c) at least one software module configured to process said scanned image to facilitate identification of edges of said object; and at least one software module configured to extract gauge measurements from said scanned image in combination into other features and elements of claim 7.

**4. Claims 1-13 are allowed.**

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Citation of Relevant Prior art**

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dimsdale (U. S. 6,246,468 B1) discloses integrated system for quickly and accurately imaging and modeling 3D objects.

Makino et al (U. S. 5,627,771) disclose apparatus and method for evaluating shape of 3D object.

Besl et al (U. S. 5,715,166) disclose apparatus for the registration of 3D shapes.
